Key
Time working on
Time working on late
Planned time

	Weeks 1 and 2 (10/2 - 10/9)	Week 3 (10/10-10/16)	Week 4 (10/17-10/23)	Week 5 (10/24-10/30)	Week 6 (10/31-11/6)	Week 7 (11/7-11/13)	Week 8 (11/14-11/20)	Week 9 (11/21-12/4)	Week 10 (12/5-12/11)	Weeks 11 and 12 (1/7-1/14)	Week 13 (1/15-1/21)	Week 14 (1/22-1/28)	Week 15 (1/29-2/4)	Week 16 (2/5-2/11)	Week 17 (2/12-2/18)	Week 18 (2/19-2/25)	Week 19 (2/26-3/4)	Week 20 (3/5-3/11)
Project Proposal **AJ**: Created proposal document **Tristen**: Came up with project idea																		
Use Cases **AJ**: Assisted and reviwed Use Cases diagram **Tristen**: Created Use Cases diagram																		
Prototypes **AJ**: Reviewed and came up with ideas in prototype **Tristen**: Created most pages in prototype																		
Database Design **AJ**: Created first draft of ERD **Tristen**: Helped revise and make changes																		
Midterm Presentation **AJ**: Created midterm presentation																		
Activity Diagrams **Tristen:** Created Activity Diagrams																		
Class Diagrams **AJ:** Created Class Diagrams																		
Heuristic Evaluation **AJ:** Came up with ideas and gave feedback **Tristen:** Implemented design/prototypes																		
Gantt Chart **AJ**: Created and updated Gantt chart																		
Wiki Site **AJ**: Created wiki site and hosted																		
Final Presentation **AJ:** Created PowerPoint and outline **Tristen:** Provided feedback and assistance for slides																		
Create API and scaffold database																		
Test connection between API and database																		
Code API layers (Models, DTO, Repository, Controllers, Hubs)																		
Add JWT authentication																		
Run unit tests and test requests/responses for API																		
Create React application and install dependencies																		
Add user authentication (login/signup)																		
Create user profile and user functionality																		
Create notifications and messaging functionality																		
Create job and reviews functionality																		
Test for bugs and review in development																		
Move database, API, and website to hosting services																		
Test connections and environment																		
Finalize everything and review for inconsistencies/bugs
