React, TypeScript, Redux, CSS, REST API, JavaScript, Testing

We're seeking an experienced React developer to build out the frontend of our next-generation SaaS platform. This is a critical project that will serve as the foundation for our product suite.

The ideal candidate will have deep expertise in modern React development, including hooks, context, and performance optimization. You'll be working closely with our design and backend teams to create a seamless user experience.

**Key Responsibilities:**

- Develop responsive, performant React components
- Implement state management using Redux or similar
- Integrate with RESTful APIs
- Write clean, maintainable, and well-documented code
- Participate in code reviews and technical discussions
- Optimize application performance

**Requirements:**

- 5+ years of professional React development experience
- Expert knowledge of TypeScript
- Strong understanding of modern JavaScript (ES6+)
- Experience with Redux, MobX, or similar state management
- Proficiency in CSS-in-JS solutions (styled-components, emotion)
- Understanding of web performance optimization
- Experience with testing frameworks (Jest, React Testing Library)

**Nice to Have:**

- Experience with Next.js or similar SSR frameworks
- Knowledge of GraphQL
- Previous work on SaaS applications
- Open source contributions

We value clean code, attention to detail, and excellent communication. Please include examples of React applications you've built in your proposal.
